Company **Profile -2009**

Lucara Diamond Corp. leads in ethical diamond exploration and high-yield investments. With innovation and transparency, we create limitless financial opportunities.

ABOUT US

Lucara Diamond Corp. stands as a beacon of excellence and innovation in the diamond mining industry, driven by an unwavering commitment to ethical sourcing, sustainable practices, and world-class production. At the heart of our operations lies the 100 percent owned Karowe Diamond Mine, a premier diamond asset located in the Boteti District of Botswana.

Since commencing production in 2012, Karowe has consistently demonstrated its status as one of the world's foremost producers of large, high-quality, Type IIA diamonds, an exclusive category that represents some of the most sought-after gemstones in existence.

The Karowe Diamond Mine has been instrumental in unearthing some of the most extraordinary diamonds ever discovered, including the historic 1,758-carat Sewelô, the 1,109-carat Lesedi La Rona, and the 813-carat Constellation, which set a record when it sold for US\$63.1 million. Most recently, we proudly unveiled the discovery of the epic 2,488-carat Motswedi, further solidifying our position as a leader in the recovery of exceptionally large and high-value diamonds. The natural splendor of these diamonds, coupled with the innovative mining techniques employed at Karowe, underscores Lucara's ability to deliver unparalleled value to shareholders, customers, and stakeholders alike.

Our subsidiary, Lucara Botswana, a wholly-owned indirect subsidiary of Lucara Diamond Corp., plays a crucial role in the responsible and ethical distribution of our diamonds. 100 percent of the diamonds sold by Lucara Botswana are natural, untreated, and ethically sourced, originating directly from the Karowe Diamond Mine. Transparency, integrity, and ethical stewardship are at the core of our business, ensuring that every diamond extracted from the earth upholds the highest standards of environmental and social responsibility. We take great pride in the fact that our operations contribute meaningfully to Botswana's economy and its people, fostering sustainable economic growth and development within the region.

Lucara Botswana has consistently delivered exceptional results, having sold an astounding 216 diamonds for more than \$1 million each, and over 11 single diamonds for more than \$10 million each. These figures not only illustrate the rarity and value

of our diamonds but also reflect the trust and confidence placed in our company by buyers, investors, and the broader global market. Our ability to consistently recover and market diamonds of this caliber is a testament to the expertise, technological advancements, and operational efficiency that define Lucara's approach to diamond mining.

Beyond our exceptional financial achievements, Lucara is deeply committed to sustainability, corporate responsibility, and long-term value

creation. Since 2014, we have paid out more than US\$271 million in dividends, a figure that far exceeds the total capital initially invested to build the Karowe Diamond Mine. This remarkable financial performance reflects our disciplined capital allocation strategy and our ability to generate strong, consistent returns for our shareholders. We recognize that our success is intrinsically linked to our commitment to responsible business practices, ensuring that our operations benefit not only our investors but also the communities and environments in which we operate.

Lucara operates with a steadfast dedication to international best practices in sustainability, health, safety, environmental stewardship, and community relations. Our team is composed of industry-leading professionals who bring decades of experience, expertise, and passion to our business. We believe in fostering a culture of transparency and accountability, ensuring that our stakeholders remain

informed and engaged in our journey toward continued growth and excellence.
